## Other contributions

- [59] K. K. HOLST. “Applications of latent variable models in neuroimaging studies”. PhD thesis. University of Copenhagen, 2011.

## Statistical software

- [60] K. K. HOLST and T. SCHEIKE. *mets (R package/C++)*. Implementation of various state-of-the-art techniques for modeling multivariate event history data including multivariate cumulative incidence models and IPCW Liability models. <http://cran.r-project.org/web/packages/mets/>. 2015.
- [61] K. K. HOLST. *lava (R package)*. An R package for specifying, estimating and simulating from latent variable models. Implementation of multiple group analyses, non-linear parameter constraints, inference with incomplete data, instrumental variable estimators, causal estimates via empirical averages. <http://cran.r-project.org/web/packages/lava/>. 2015.
- [62] T. GERDS and K. K. HOLST. *SuperMan (emacs lisp package)*. Project manager for (bio)statisticians based on emacs org-mode. Provides version control facilities and lays out foundations for an effective computing environment for conducting reproducible research. <https://github.com/kkholst/SuperMan>. 2015.
- [63] K. K. HOLST. *EventHistory (Julia package)*. Event History Analysis in the *Julia* language. Includes a very fast implementation of Cox's proportional hazards model for left truncated data. <http://github.com/kkholst/EventHistory.jl>. 2014.
- [64] K. K. HOLST. *neurocdf (R package)*. R package for working with neuroimaging data in out-of-memory objects in R using the netcdf format. The read/write facilities in the external netcdf data-structure provides an elegant bridge between R and SPM (as well as other software platforms). <https://github.com/kkholst/neurocdf>. 2014.
- [65] K. K. HOLST. *gof (R package/C++)*. Goodness-of-fit procedures based on cumulative residual processes. Methods available for assessing link-function or functional form of linear predictors in Generalized Linear Models, assessing the proportional hazards assumption in a Cox regression, and assessing linearity assumptions in Structural Equation Models. <http://cran.r-project.org/web/packages/gof/>. 2014.
- [66] K. K. HOLST. *lava.mixture (R package)*. Extension of lava to flexible distributions by providing models for general finite mixtures of latent variable models. <http://r-forge.r-project.org/projects/lava/>. 2014.
- [67] K. K. HOLST. *lava.tobit (R package)*. Extension of lava to binary and left/right-censored normal/log-normal distributed outcomes. <http://cran.r-project.org/web/packages/lava.tobit/>. 2014.
